INTERESTS

Professional: Software Engineering | Data Science | Human-Computer Interaction

Personal: Reading | Biking | Yoga

WORK EXPERIENCE

Rentable Technology Corp.

Boston, MA

Software Engineer

September 2021 - December 2024

- Implemented a payment plan model for the platform from end-to-end using React/JS and Python, bringing in over \$300k in security deposits
- Found a discrepancy in company interest calculations and implemented a fix that would save \$20k per year in incorrect interest disbursements
- Worked with third-party integrated services to increase user engagement on the platform

ExxonMobil Corp.

Houston, TX

Software Engineer

September 2020 - September 2021

- Designed & coded an internal website for employee recording permission requests using Vue.js & Express; important for documenting remote meetings during COVID
- Automated permission approvals based on user input, giving time back to employees for more essential tasks

PERSONAL PROJECTS

[Webpack Template](#)

December 2024

- Created a project template with the webpack module bundler to serve as a starting point for new projects; includes detailed comments about webpack's configuration setup

[Personal Website](#)

December 2022

- Personal website/blog using Ruby-based static site generator Jekyll, and Liquid template language to render pages with my desired content; hosted with Github Pages

EDUCATION

University of Florida

Gainesville, Florida

B.S. in Computer Science

Graduated in 2020

GPA: 3.73/4.0
